

ALKAMA UMAR LIMAN

Python Django Backend Developer

Nigeria alkamaumarliman@gmail.com github.com/alkama2022 linkedin.com/in/alkamaumarliman

PROFILE

Dedicated Python Django Backend Developer and Information Technology student based in Nigeria, specializing in secure, scalable, and modern web applications using Python, Django, Django REST Framework, and PostgreSQL. Passionate about solving real-world problems through clean code and thoughtful architecture, and actively seeking opportunities to grow, contribute to meaningful projects, and collaborate with teams that value innovation and quality.

TECHNICAL SKILLS

Programming Languages

Python, JavaScript, TypeScript, SQL

Frontend

React, Tailwind CSS, HTML5, CSS3

Backend

Django, Django REST Framework, REST APIs, JWT Authentication, PostgreSQL, MySQL

Tools & DevOps

Git, GitHub, VS Code, Postman, Docker

EXPERIENCE

SIWES Industrial Training

IT Company / Institution

2024

Completed industrial training focused on software development, database management, and real-world project exposure. Gained hands-on experience with backend systems and collaborative development workflows.

Freelance Projects

Self-employed

2023 — Present

Developed backend systems and APIs for small businesses and clients. Delivered solutions for inventory management, e-commerce, and data-driven applications using Django and PostgreSQL.

Academic Projects

University

2023 — Present

Built multiple academic projects covering operating systems, networking, database systems, software engineering, and system analysis and design.

Open Source Contributions

GitHub

Ongoing

Actively contributing to open-source Django and Python projects through issue reporting, documentation improvements, and small feature contributions.

EDUCATION

B.Sc. Information Technology

University in Nigeria

2022 — Present

Focus on software engineering, backend development, and database systems. Coursework: Operating Systems, Networking, Database Systems, Software Engineering, System Analysis and Design.

CERTIFICATIONS

- Python for Backend Development — Planned / In Progress (2025)
- Django Web Development Certification — Planned / In Progress (2025)

- PostgreSQL Database Fundamentals — Planned / In Progress (2025)

SELECTED PROJECTS

VetLink — Digital veterinary and agriculture platform connecting farmers, veterinarians, clinics, and laboratories through animal health management, disease reporting, and agricultural solutions.

Django, Django REST Framework, React, Vite

TyreHub Automobile Tyre Management System — E-commerce and inventory management system for automobile tyre shops with product catalog, shopping cart, order management, and admin dashboard.

Django, Django REST Framework, PostgreSQL, React, Tailwind CSS

Student Grade Management System — Django-based platform for managing student records, courses, and grades with role-based access, automated grade calculations, and report generation.

Python, Django, PostgreSQL, Bootstrap, JavaScript

E-Commerce API — Production-ready REST API for e-commerce applications supporting authentication, shopping cart, product management, and order processing.

Django REST Framework, JWT, PostgreSQL, Docker
